

Backed by World-Leading Investors

"The investment in AutogenAI by Salesforce Ventures highlights our conviction that AutogenAI's software is a game-changer for enterprises that secure business via tendering and drafting proposals."

- Nowi Kallen, Managing Director, Salesforce Ventures.

AutogenAI is proud to be backed by some of the world's leading investors, including Blossom Capital, Spark Capital, and Salesforce Ventures.

In just four months in 2023, we successfully raised over \$60 million. In July 2023, we secured our first major funding of \$22 million in a Series A round led by Blossom Capital. This investment was instrumental in facilitating the enhancement of our AI-powered proposal writing software.

The progress continued as we successfully raised an additional \$39.5 million in Series B funding in December 2023, a venture co-led by Salesforce Ventures and Spark Capital. These significant investments highlight our commitment to providing competitive advantage and to putting our software in the hands of every organisation writing bids, tenders and proposals. With this funding, our focus lies in heavy investment in Engineering and R&D, constantly incorporating the latest breakthroughs in deep AI research for the benefit of our customers.

Additionally, we are continuing to expand our sales and marketing functions so that millions more people can benefit from our technology. This investment includes further international expansion into the EU and the Middle East, as well as expanding our reach in the US and Australia.
